Crowns & Bridges

Beautiful, healthy smile makeovers

At Orthodont, our dental technicians understand that attention to detail is key in delivering a consistent stress-free solution for you, your staff and your patients. We are pleased to provide, bars, crowns, bridges and veneers using porcelain fused to metal, full metal, all-ceramic, CAD/CAM, Zirconia and metal alloys including titanium.

NobelProcera™ | IPS e.max® | Porcelain Bonded to Titanium
Custom Shading & Staining | Zirconia | CeltraPress | GC Liese

Zirconia
(Layered Zirconia)
Crowns & Bridges

Zirconia
(Full Contour)
Crowns & Bridges

In Lab Processing Time:

Any Crown to 4 units	5 days
All Crowns (5+units)	7 days
All Crowns (9+units)	10 days

Note: Pick-up & delivery time not included

Crown and bridges based on Zirconia are the strongest and most aesthetically translucent restorations available in dentistry today. Up to five times stronger than all porcelain restorations, nothing looks more like natural teeth. Zirconia is 100% biocompatible.

We are fully committed to Digital Dentistry and accept digital files from any Intra-Oral Scanner.

Dental Implant Prosthetics

Replace missing teeth, secure loose dentures

Orthodont works with all the major implant manufacturers to meet your needs for implant, crown, bridge denture and full mouth reconstructions. Orthodont offers integrated treatment plans for cosmetic and implant restorations that will achieve radiant smiles for your patients. Orthodont has the knowledge, experience and technology to support you in every step of treatment:

- Pre-prosthetic planning
- Restorative options
- Procedures for final restorations

Our surgical kits, impression copings and torque controller are also available without charge by appointment to assist you with your implant impressions, insertion and restoration.

Snoring & Sleep Apnea Appliances

Snoring is no Joke!
Enhance quality of life.

Orthodont's extensive line of Snoring & Sleep Apnea appliances offers patients relief and a preferred alternative to CPAP or surgery. An oral appliance can be used to reduce the volume and frequency of snoring or to improve airflow and interrupted breathing. Our knowledgeable and certified technicians can assist you in selecting and in the construction of the ideal appliance for your patients.

Orthodontics

Broad, beautiful smiles for all ages

At Orthodont, we provide Orthodontists and General Dentists with the most current, leading edge custom appliances, invisible aligners and clinical support to back our products and services. At Orthodont we are committed to providing continuing education for all of our technicians and staff so that we can remain ahead of the technology curve and help you in your orthodontic needs. Our fixed and removable appliances include:

Twin Block | Series 2000® | Herbst | Schwartz/Sagittal | Mara/Super Screw
 Habit Breakers | Splints Orthotics | Positioners | Rapid Palatal Expanders
 Invisible Aligners | A.L.F. | Night Moves | ClearBow | Streamline Aligners

Orthodont's removable appliances come in your choice of colour with a complimentary retainer case. Several times a year we offer continuing education seminars on orthodontics; by bringing in specialists in their field to share their knowledge with you. Insurance plans are also available. Call for details.

Night Moves aligners add a new twist to removable braces to get results at night, in the privacy of their own home. It is cost-effective to correct mild orthodontic problems.

The ClearBow Hawley retainer is designed to provide superior aesthetics encouraging patients to wear their durable clear Hawley retainer without feeling self-conscious.

Streamline Aligners provide faster, less expensive orthodontics option for patients who need minor tooth movement.

In Lab Processing Time:

Retainers/Space Maintainers	2 days
Local Repairs	Same day
Expansion Appliance	3 days

Note: Pick-up & delivery time not included.

Mouthguards & Thermoforming

Protect their teeth.
They can last forever.

Orthodont's custom made mouthguards are the most satisfactory of all types of mouth protectors. They fulfill all the criteria for adaptation, retention, comfort and stability of material. These types of mouthguards are worn by the professional athletes; they fit tighter, are more comfortable and last longer. Orthodont was one of the pioneers in neuromuscular mouthguards for athletes at all levels of sport participation. Allow us to help you boost your patient's performance.

Playsafe® | Proform | Impack Performance | Bleaching Trays | PerioProtect® | Aligners

In Lab Processing Time:

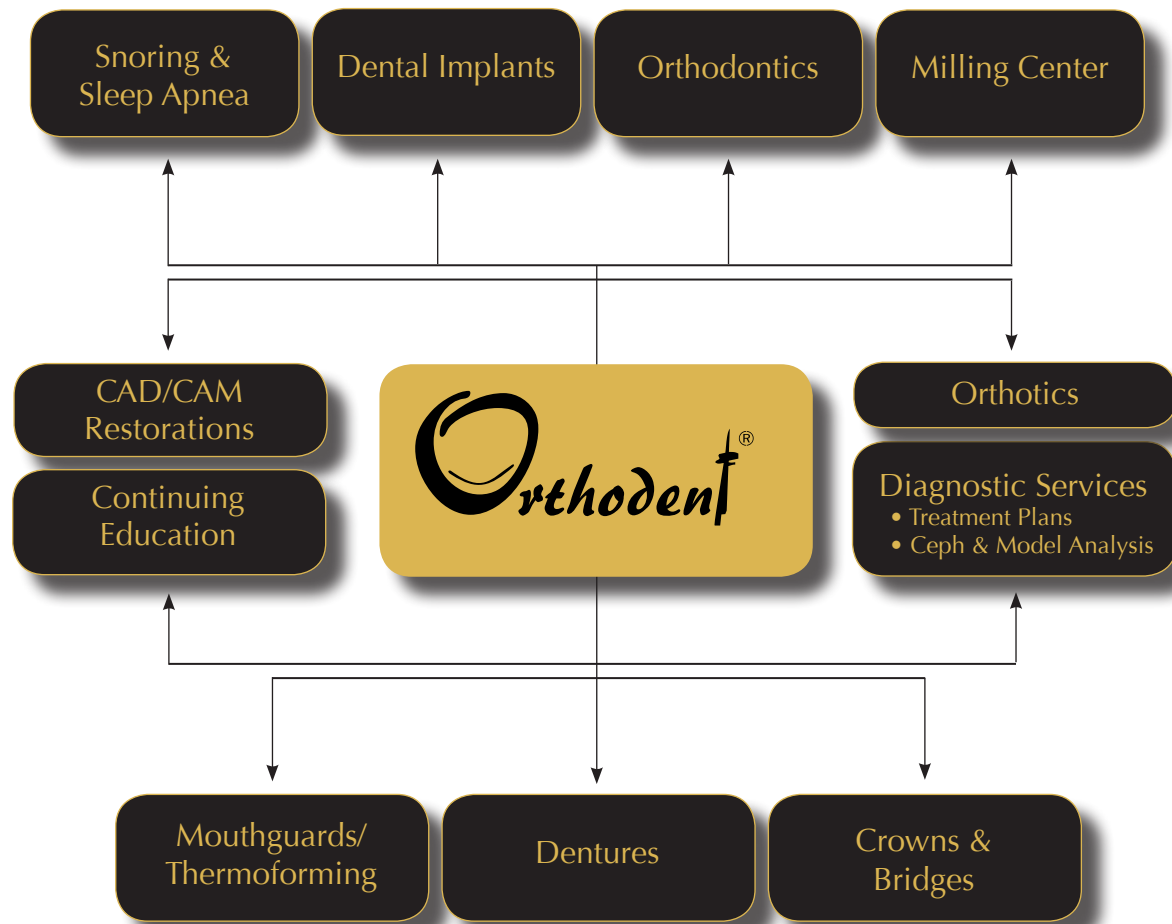

Essex	2 days
Bleaching Tray	2 days
Aligner	5 days
